

FLOOD DOOR

C O L L E C T I O N

The **Flood Door Collection** first and foremost provides reliable and passive flood protection for your home or business.

That means they operate 24/7 without human intervention. So if you're affected by an unexpected flash flood or you're away, your front door will still be protected.

We offer a range of styles, colours, glass and fittings to help you create the perfect door for your property.

All our doors are manufactured and supplied to order here in the UK and fitted using our approved installer network, giving you complete peace of mind that your new composite flood door will be covered by our 5 year performance guarantee.

In addition to the peace of mind the **composite flood door** provides against the risk of flooding, they offer so much more. Enhance your home or business with stunning styling, security and thermal performance.

They provide the natural look of a traditional timber door with none of the maintenance drawbacks. It will not warp or crack and there's no need for regular painting to keep it looking at its best.

Replacing your existing doors with **uPVC flood doors** gives you ultimate peace of mind and simplicity. It means that you don't have to worry about installing flood panels to protect doorways, so there's no chance of getting caught out if flooding occurs suddenly or while you are away.

Of course, you also have to have other 'automatic' protection in place such as the SMART Airbrick and Non Return Valves. Please note, that in some circumstances that won't be adequate protection, so it's always better to have a Flood Defence Survey carried out.

We can supply flood resistant doors in a range of styles, colours and fittings, single width and double width.

All these doors have been tested against the standard set of tests as defined in PAS 1188-1:2014 which represent typical conditions that might be experienced during a flood in the UK.

This involves testing a product for leakage under static water levels of 600mm, waves up to 100mm high and parallel currents up to 1.0 m/s.
